

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings of claims in the application:

**Listing of Claims:**

1. (Currently amended) A method of treating migraine in a subject in need thereof, the method comprising the step of administering to the subject an amount of a specific steroidal glucocorticoid receptor antagonist effective to treat migraine in the subject,

(i) with the proviso that the subject is not otherwise in need of treatment with a glucocorticoid receptor antagonist, ~~and~~

(ii) with the proviso that the subject is not also being treated with triptans nor any other pharmaceutically prescribed entity that is predominantly metabolized by a cytochrome P450-3A4 isoenzyme, and

(iii) with the proviso that the specific steroidal glucocorticoid receptor antagonist is devoid of progesterone receptor binding activity.

2. (Original) The method of claim 1, wherein the subject is a human.

3. (Original) The method of claim 1, wherein the treatment for migraine is administered prophylactically.

4. (Original) The method of claim 3, wherein the treatment for migraine is administered daily.

5. (Original) The method of claim 1, wherein the treatment for migraine is administered during the course of a migraine attack.

6-11. (Canceled).

12. (Original) The method of claim 1, wherein the glucocorticoid receptor antagonist is administered in a daily amount of between about 0.5 to about 35 mg per kilogram of body weight per day.

13. (Original) The method of claim 12, wherein the glucocorticoid receptor antagonist is administered in a daily amount of between about 5 to about 15 mg per kilogram of body weight per day.

14. (Original) The method of claim 1, wherein the administration is once per day.

15. (Original) The method of claim 1, wherein the mode of administration is by a transdermal application, by a nebulized suspension, or by an aerosol spray.

16. (Original) The method of claim 1, wherein the mode of administration is oral.

17-21. (Canceled).
